

MARITIME SECURITY OF OFFSHORE ACTIVITIES & INSTALLATIONS: LEGAL ASPECTS

20 JUNE 2019

House of Science Bremen

9.00 am - 1.00 pm

DESCRIPTION

Organised by the Jean Monnet Chair on International and European Law of the Sea (IELoS) and the Institute for the Law of the Sea and International Marine Environmental Law (ISRIM), in co-operation with the University of Genoa, the University of Applied Sciences Bremerhaven and the University of Bremen, this half-day workshop aims at bringing together a select panel of speakers with a variety of backgrounds for the purpose of discussing current legal aspects related to maritime security of offshore activities and installations. The topics that will be presented include, among others, border control, illicit trafficking as well as maritime security of offshore oil & gas exploitation and of wind farms.

Presentations will touch upon the academic and the practical legal aspects of maritime security of offshore activities and installations. A Q&A time will be provided. Bremen, thanks to its maritime heritage, offshore industry and close links to the North Sea, represents a perfect venue for the workshop.

This event should not be missed by all those with a professional or scientific interest into the legal aspects of maritime security. Certificates of attendance will be delivered if requested by email upon registration.
